Conditions for DG Set

1. Noise from the DG Set should be minimized by providing an acoustic enclosure which should be made adequately.
2. Industry should ensure adequate provision for proper siting. The acoustic enclosure should be designed for minimum 25 dB (A) insertion loss for the frequency included noise bands in accordance with SWS Code. A suitable exhaust muffler with a maximum loss of 25 dB (A) and ability provided. The measurement of insertion loss will be done at minimum points at 2.5 meters from acoustic enclosure and then average.
3. Industry should make efforts to bring down noise level due to prevent outside industry premises, where ambient noise level exceeds background sitting and control measure.
4. Installation of DG Set must be strictly in compliance with recommendations of DG Set manufacturer.
5. A proper routine and preventive maintenance programme for DG set should be set and followed in consultation with the DG manufacturer which would help to prevent trouble levels of DG set from deteriorating with use.
6. DG Set shall be operated only in case of power failure.
7. The applicant should not cause any nuisance in the surrounding area due to operation of DG Set.
8. The applicant shall comply with the notification of MOEF dated 27.05.2002 regarding noise limit for generator sets run with diesel.
